

(2019, October 10). *ArtNouveau*. [https://en.wikipedia.org/wiki/Art\\_Nouveau\\_furniture](https://en.wikipedia.org/wiki/Art_Nouveau_furniture)

This webpage has a summarized description of what Art Nouveau is. It was a relevant source because it introduced a topic that may not be familiar to everyone, and it will be relevant towards the final objective in my presentation. The webpage offers some insight on what this art looks like via images and descriptions. The value is in the images, for art is a visual explanation. This source, even though is Wikipedia, is reliable enough because I only intend to use the ideas not the material in the webpage.

Maymont Estate. (2019, October 09). *An American Estate*. <https://maymont.org/estate/>

The webpage shows what the park looks like, and what it has to offer to the public and the visitors. It is relevant to the topic because it informs the viewer what the significance of such house is in the topic, and not introduce an idea without some background context. The webpage is a summary of the place I will be talking about, and because it is a (.org) website, it is pretty reliable.

World Wildlife Fund. (2019, October 2). *Unicorn of the Sea: Narwhal Facts*.

<https://www.worldwildlife.org/stories/unicorn-of-the-sea-narwhal-facts>

The webpage offers some facts about what the whale Narwhal. This animal is really weird, rare, and not many people know about it. This page gives the viewers of my presentation an idea of why Narwhals are awesome, and why they should care about them. The author supports the importance by keeping it very simple and the power of images in the

webpage connects his point of view. Because this is a (.org) website it is usually pretty reliable source.

*Yin, Sandra.* Lifestyle Choices Affect U.S. Impact on the Environment. (2019, October 10).

<https://www.prb.org/lifestylechoicesaffectusimpactontheenvironment/>

This webpage offers a detailed description of how American culture has a big impact on the environment. She touches many points, and supports all of them with many science articles, and supporting evidence from many sources. The information is relevant because it explains about my culture, and how me, an American, negatively impacts the environment.
